DOCUMENT TYPE- A

PUBLICATION DATE- 2000-06-16

INTERNATIONAL PATENT CLASS- H04N00716; G06F00100; H04N00544

APPLICANT(S)- FUNAI ELECTRIC CO LTD

PUBLICATION COUNTRY- Japan

PROBLEM TO BE SOLVED: To obtain a password controller capable of releasing a password only by a specific person and reducing the load of the manufacturer side.

SOLUTION: In the case that a parent that is a registration person of an inhibit level forgets a password, when the parent inserts a password release card 91 added at purchase of a television receiver to an insertion port 92a formed to an operation panel 80, a tip of the password release card 91 depresses a press down face 93a to close a tact switch 93 so that a microcomputer 20 releases the registered password, then only the specific person can release the password without imposing the load onto the manufacturer side.
